

**Smarter NCD care
for a healthier Ghana**

 **EasySimple**
presents

**An NCD
solution for
CHPS**

- Transform any CHPS facility into an AI-powered diagnostic centre.
- Detect NCDs early, manage care better, and reach more clients with intelligent tools built for Ghana's health system.
- One kit. All the tools. Real results.

- Built for the toughest conditions – waterproof, fallproof, explosion proof and theft-proof.
- Fine-tuned antennas boost connectivity, even in the most remote areas.
- Long-lasting battery life – stays powered for days without charging, and can double as a powerbank to charge other devices.

ONE SMART DEVICE FOR 5 VITAL SIGNS

1 BLOOD PRESSURE

BLOOD GLUCOSE 2

3

BODY TEMPERATURE

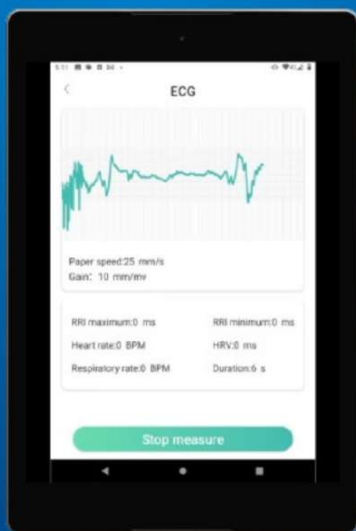

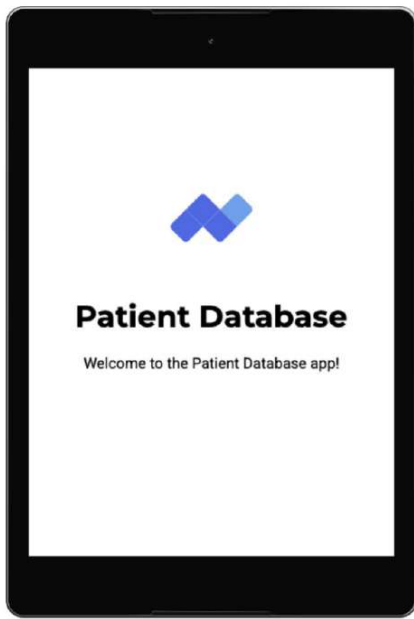

4

BLOOD OXYGEN

5

ECG / EKG

Stores all patient records safely and digitally.

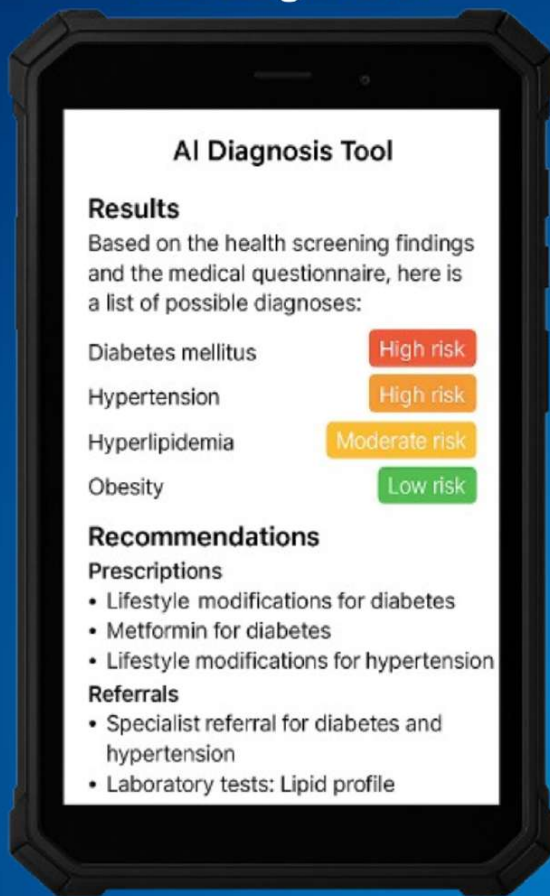

Access any patient's history with a Ghana Card scan

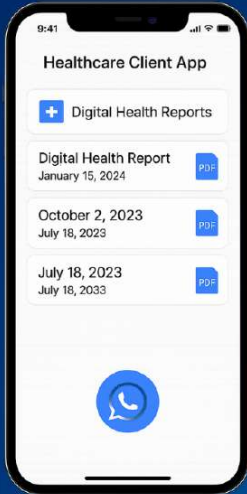

Works offline and connects directly to DHIMS.

Powered by Artificial Intelligence

- Analyses client health results and suggests possible diagnoses.
- Recommends treatments and referrals.
- Supports health workers in making accurate clinical decisions.

CLIENT HEALTH PLATFORM

Empowering clients to track and manage their health.

Clients can access and download their digital health reports anytime, to share with doctors anywhere.

Clients can ask health questions and get instant answers powered by AI.

PROOF OF CONCEPT RESULTS

- **123%** increase in diabetes detection across screened clients.
- **38.7%** rise in newly identified hypertension cases.
- **100%** of nurses reported easier and faster health screenings.

COST SAVINGS FOR GOVERNMENT

Deploying the AI Health Kit nationally can lead to:

Up to 65 % savings

by replacing multiple devices with one smart clinical tool.

50 % reduction

in paper-based recordkeeping costs through digital automation.

30% lower staffing expenses

as the kit supports diagnostics, admin tasks, and assists with client guidance—reducing the need for extra personnel.

Cost Savings

For Citizens:

100% free screenings
at local CHPS facilities –
no out-of-pocket cost.

Up to 70% savings
by accessing tests at CHPS
that usually require paid
visits to higher-level
health facilities.

40% cut in
travel costs
with access
to local care
and remote
consultations.

Why Deploy the AI HEALTH KIT Nationwide:

Elevate CHPS to modern diagnostic centres supporting NCD care

Lower disability and mortality rates linked to NCDs

Deliver substantial cost savings in comparison to the status quo

Transform health outcomes for Ghanaians across all stages of life
